70% Alcohol

- With an ethanol content of 70%, Hansans is Anti-Viral and Antibacterial, helping reduce the risk of infection.

Innovative Bottle

- Our innovative roll-on bottle makes it easy to dispense just the right amount of sanitiser, when and where you need it.
- A controlled flow from the ball optimises the use of sanitiser, allowing our bottle to last you longer.
- The anti-spill design of the roller ball makes our bottle suitable for transportation in bags and backpacks without risk.
- As the flow of gel is regulated, our bottle prevents the gel from being drunk, making it safer for use by those at risk.

Registered & Certified

- Our hand sanitiser is registered and certified, complying with EN 1275 and EN 1276
